

**Earbuds Pro**  
**Active Noise Cancelling**

**Manual - Handleiding**

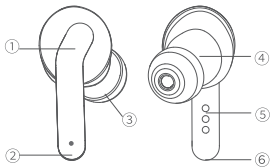

## Genuine wireless active noise reduction technology

Through Bluetooth wireless technology, you can connect to compatible devices without using any cable. Maximum distance between the two devices is 10 meters (approx. 30 feet).

By using active noise reduction technology, the microphone collects noise and is able to generate reverse sound waves, which are sent out via the speaker. This way external sounds will be cancelled out.

### 1. Specification of the Product

Model:	NC100
Noise reduction quantity of ANC:	28dB
Bluetooth version:	5.0
Impedance:	32Ω
Scope of frequency:	20Hz~20.000Hz
Charging way:	Type-C
Capacity of battery in earphone:	70mAh×2
Capacity of battery in charging box:	340mAh
Charging time of earphone:	1.5H
Charging time of charging box:	1.5H
Working time (noise reduction off):	8.5H
Working time (noise reduction on) :	8H

- ① Touch key
- ② Indicator
- ③ Silicone tips
- ④ Vent system (for pressure equalization)
- ⑤ Charging needle
- ⑥ MIC for call

## 2. Automatic on/off

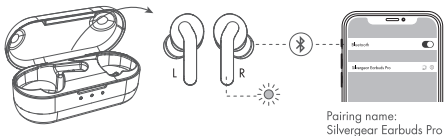

Auto on: Take the earphones out of the charging unit, and they will turn on automatically.

Auto off: Put the earphones into the charging unit and they will disconnect and turn off.

### 3. Bluetooth pairing

The left earplug and right one have been paired already. To pair the earphones with another device: Take the earphones from the charging unit. The main earplug (right) will enter into pairing mode automatically (red and green lights on the main earplug flicker alternately), use your device to search, pair and connect. Pairing name: Silvergear Earbuds Pro.

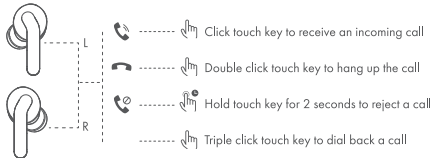

### 4. Active noise reduction function

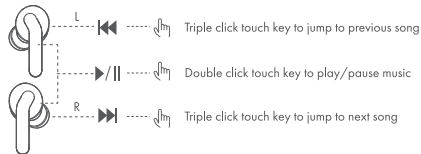

To turn active noise reduction on or off, hold touch key on the right earplug for 2 seconds. When the function is activated or cancelled the earphone will make a sound.

## 5. Call control

## 6. Music control

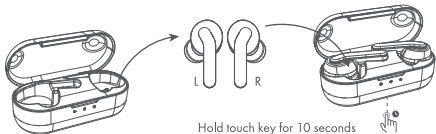

## 7. Voice assistant

When the earphones are in use, enable voice assistant (such as Siri and Google Assistant) by holding the touch key for 2-3 seconds.

## 8. Clear Bluetooth pairing record

Take the earphones out of the charging unit, and put them back. When the indicators on the earplugs are in red for charging, hold touch key for 10 seconds. When the indicator flickers 3 times, pairing information will be cleared.

## 9. Working status of indicator

Earphone mode	Status of indicator
On	Green light is on for 1 second
Off	Red light is on for 1 second
Standby	No light
Connect again	No light
Earphone pairing state	Red and green lights flicker alternately
Earphone charging state	Red light is on
Earphone is fully charged	No light
Charging box is fully charged	3 LED lights are on

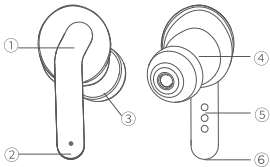

## Draadloos active noise reduction technologie

Door middel van draadloze Bluetooth-technologie kunt u verbinding maken met uw apparatuur (zonder kabel). Het maximale bereik is 10 meter.

Door de noise reduction technologie wordt de ruis verminderd. De technologie creëert tegenovergestelde geluidsklanken en deze omgekeerde geluidsgolven heffen het geluid van buitenaf op.

### 1. Productspecificaties

Model:	NC100
Noise reduction kwantiteit:	28dB
Bluetoothversie:	5.0
Spanning:	32Ω
Frequentiebereik:	20Hz~20.000Hz
Oplaadkabel:	Type-C
Batterijcapaciteit oordopjes:	70mAh×2
Batterijcapaciteit charging case:	340mAh
Oplaadtijd van oordopjes:	1,5u
Oplaadtijd van charging case:	1,5u
Speeltijd (noise reduction uit):	8,5u
Speeltijd (noise reduction aan):	8u

- ① Touch key
- ② Indicator
- ③ Silicone oorcaps
- ④ Vent (voor drukcompensatie)
- ⑤ Oplaadpunt
- ⑥ Microfoon

## 2. Automatisch aan/uit

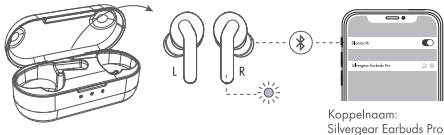

Auto aan: de oordopjes schakelen automatisch in wanneer u ze uit de charging case haalt.

Auto uit: de oordopjes verbreken verbinding en schakelen automatisch uit wanneer u ze terug in de charging case legt.

### 3. Koppelen via Bluetooth

Voor het gemak zijn het linker- en het rechteroordopje al gekoppeld. Koppel de oordopjes met uw device: haal de oordopjes uit de charging case, het hoofd-oordopje (rechts) gaat automatisch in de koppelingsmodus (knipperen rood en groen), zoek met uw device naar de oordopjes, klik om te koppelen (Silvergear Earbuds Pro) en verbinding te maken.

### 4. Activeer noise reduction functie

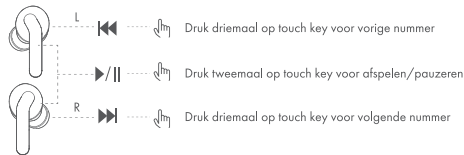

Houd de touch key op het rechteroordopje 2 seconden ingedrukt om de noise reduction functie te activeren of uit te schakelen. U hoort twee tonen.

## 5. Oproepen bediening

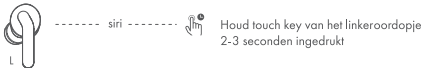

## 6. Muziek besturen

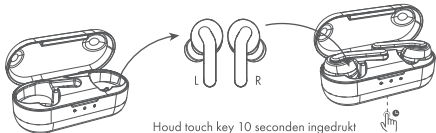

## 7. Voice assistant

Schakel de spraakassistent in (zoals Siri en Google Assistant) door de touch key van het linkeroordopje 2-3 seconden ingedrukt te houden

## 8. Verwijder Bluetooth koppelingen

Haal de oordopjes uit de charging case en stop ze vervolgens direct weer terug in de charging case. Wanneer de indicator rood kleurt dient u de touch key 10 seconden ingedrukt te houden. Als de indicator 3 keer knippert, is het koppelbestand verwijderd.

## 9. Status van de indicator

Modus oordopjes	Status van indicator
Aan	Groen licht 1 seconde aan
Uit	Rood licht 1 seconde aan
Standby	Geen licht
Opnieuw verbinden	Geen licht
Oordopjes koppelen	Rood en groen licht knipperen
Oordopjes opladen	Rood licht aan
Oordopjes volledig opgeladen	Geen licht
Charging case volledig opgeladen	3 LED-lichten aan
